

CHARLESTON

Our Charleston, SC facility includes 100,000 square feet of U.S. Customs Bonded warehouse storage space, as well as climate controlled storage options. We are just minutes away from local ports and are supported by a variety of reputable trucking brokers. Similar to other locations of The Dupuy Group, our Charleston location is fully equipped with RF scanners and inventory tracking management systems. Although this location has a heavy focus on our work with industrial products, we are also very specialized in handling food grade products with the work from our internal quality and food defense team.
